A premium blended cellulose bonded fiber matrix made from the toughest agricultural fibers, with the added benefit of 10% pre-blended tackifier. Evolution BFM outperforms other products in its class according to third party rainfall erosion control testing, with an effective rate of 99.5%. The natural fibers break down slowly, protecting the soil for long term erosion protection, lasting over 12 months.

ADVANTAGES

- Fast to load from easy to handle bales
- Mixes easily with water
- Flows smoothly and gives you uniform distribution
- Provides all the benefits of naturally long interwoven fibers while utilizing wood cellulose mulch coverage benefits as well as the binding strength of Triple Tac™ tackifier

APPLICATIONS

- Aerial
- Hydro-Seeding
- Extreme Erosion Control

TYPICAL PROJECTS

- Dust Control
- Highways
- Golf Courses
- Forest Fire Reclamation
- Mine Reclamation

PHYSICAL PROPERTIES

- Water Holding Capacity >1200%
- Moisture Content 12% +/- 3
- Organic Matter >95%
- Ash Content <5%
- pH Range 7.1 +/- 2
- Blended Tackifier 10% +/- 3%
